Scope of work details:

Project One (1) – E-Rate Switch Purchase, Installation, and Configuration:

The purpose of this project is to purchase, install and configure approximately 1,303 switches and related components (transceivers, patch cables, etc.) at approximately 48 school locations. The vendor will configure the equipment and install the equipment at the appropriate school. See Appendix A

Project Two (2) Part A – E-Rate Eligible Remove and Replace.

Project Three (3) on page 16

Aruba Support and Aruba Central licensing for both Part One (1) and Two (2) The district's existing licenses are valid through early June 2026. To maintain continuous annual coverage, any new or extended licensing should be order in May 2026, ensuring the renewal period aligns from June 2026 through June 2027.

Do Not process Purchase Order for licenses until May of 2026.

The vendor will be responsible for warehousing the equipment until it is ready to be installed. The vendor will be required to transfer the equipment from its storage facility to the appropriate school. The vendor will configure the equipment and install the equipment at the appropriate school. The vendor is responsible for any damages or loss that occur during the transportation of the equipment. The table below identifies the quantities and SKUs of the equipment that will need to be installed and it is also included in Appendix A broken down by project.

Aruba AP-635 (R7J28A) Schools	1873
Aruba AP-635 (R7J28A) Admin sites	96

It should be noted that there may be slight variances in the quantities required per site. The vendor may need to install more or fewer of each product at a given site. Vendors should perform a walk-through of each site before beginning work at a site, which will allow the district and the vendor to verify the exact quantities required.

Vendors must complete the tables on the tab labeled “Attachment-A Cost Sheet”. The table requires the vendor to enter certain data elements that will be used to calculate the total cost of each project. Those data elements are

- The unit cost for each of the products in this Project
- The unit cost for the installation and labor of switches and related components
- The unit cost for the configuration of switches and related components
- The unit cost for the installation and labor of wireless access points and related components
- The E-Rate eligibility percentage of each SKU

These inputs will then be used to calculate the total do not exceed cost for this project that will be used for the cost evaluation.

Technical Specifications for the Project:

APS Technology is currently utilizing HP IMC, Aruba Central, Aruba Wireless controllers, and Aruba Mobility Conductor for enterprise switch management, and as such prefers HP/Aruba enterprise switches and access points or equivalent for seamless integration and management into the existing ecosystem.

Note: If another solution is proposed, Vendors need to clearly demonstrate that the solution is capable of providing the same features and functionality as the originally requested solution. Vendors proposing alternative solutions must also include certified training for two (2) system administrators and two (2) techs with a focus on showing how the system would integrate with the District’s current system for seamless operation and management.

Switch Technical Specifications

The District’s standard for network electronics is HP/Aruba. The District has a strong preference for HP Aruba products for edge switches due to training and compatibility purposes. In accordance with DA 11-1991 the District will consider network components that provide the same functionality. Vendors wishing to offer alternative makes or models of network electronics must demonstrate how the proposed gear will function within the current infrastructure. Proposed alternative products must meet the requirements listed below and bidders must provide documentation demonstrating this to be the case.

Electronic Rack and Stack Components

1. The Vendor will provide the following electronics:
 - a. Network Switches (48pt / 24pt / 12 port)
 - b. Power Supplies for Network Edge Switches
 - c. Aruba 635 series Access Points
 - d. Direct Attached Cables to Connect Switch Stacks
 - e. Transceivers – Fibers SFP (3 types identified below)
2. It is the responsibility of the vendor to configure all network switches using images provided by APS IT. The switch configuration may be completed at the Vendor’s location or on site and the selected Vendor will meet with the APS Network Team to determine where the configuration will occur. If the switch configuration is to be performed at Vendor’s location, the selected Vendor will provide appropriate space and electricity.
3. Electronics installation will be scheduled outside of normal instructional hours. School schedules may

allow for installations to be scheduled during other times. This will be determined on a case-by-case basis. Turn-ups and testing will need to be coordinated with the APS Network team.

4. Electronics removed from the school will be delivered to the APS Data Center (930 Oak St) or another APS location by the Vendor upon approval by APS.
5. The Vendor will haul off any refuse from the electronics and cabling packing. Trash dumpsters at the school sites can be used for disposal of refuse.

Switch Minimum Requirements

Proposed switch models must meet the following minimum requirements:

- Must be capable of being managed by the IMC and Aruba Central network management system to support Zero Touch Provisioning.
- Must be capable of providing POE+
- Must be capable of being stacked to create a single management switch.
- 12 port/ 24 port / 48 port access switch must support NBASE-T technology providing the ability to deliver 2.5 and 5 Gbps over twisted pair on at least 4 ports.
- Must support industry standard OpenFlow and the HPE Software Defined Network Controller.
- Must support role-based policies capable of automatic tunnel creation for secure traffic segmentation using APS's existing ClearPass Policy Manager.
- Must support application layer firewalled policy with roles providing differentiated access using a single VLAN.

Additional Switch Requirements

1. If submitting equivalent switch models which require additional licensing for required features, offer must include the cost of those licenses in the proposal.
2. The District desires an E-Rate eligible multi-year warranty for a period up to three years that is provided as an integral part of an eligible component, without a separately identifiable cost. If the proposed product does not include an E-Rate eligible multi-year warranty Vendors must provide a quote for a three-year extended warranty. This cost will be evaluated as part of the E-Rate ineligible items.
3. If submitted switch manufacturers vary from existing switches used by APS (HP/Aruba) for edge switches, offer must include the cost of training a minimum of two (2) network administrators and two (2) techs in the proposal. This cost must be clearly identified as either E-Rate eligible or ineligible.

Access Point Technical Requirements

Remove and replace all existing Aruba 300 Series Models Wireless Access Points (WAP) from each of the eight (8) Admin sites listed in Appendix B.

Contractors will utilize existing As-Builds, site walks, and APS IT representatives to identify existing WAP and replace with new Aruba WAP AP-635 (R7J28A), or equivalent, wireless access points. WAPs must be installed utilizing the Aruba Mounting Kit (R1C72A) or equivalent. WAPs must be installed using existing patch cables unless damaged. APS will provide additional patch cords if required. Vendors should contact APS IT if additional patch cords are required. The new access points will replace existing access points in their current location. Therefore, no moving of the wireless access points is required for this SOW. The bidder will remove and replace the existing access points.

Scope of Services

Installation of all electronics, patch cables, etc. will be completed in accordance with the scope of work. The installation of switches and access points will utilize existing cabling and patch cords. Any cabling to be replaced will be provided by the district from existing inventory.

1. The contractor shall provide and install the materials specified herein and any other materials, as required, to deliver a fully functional and operational network within the specified space(s) mentioned in the scope of work. including but not limited to:

 - g. Purple – Mechanical

Note: Patch Cord lengths for electronic connectivity will be determined by the contractor on-site. Contractor should anticipate enough length to reach a specification and patching between network switch and patch panels. Dress all cables per EIA, TIA, and BICSI Standards.

Rack Setup Example

One (1) RU spacing between all patch panels, network switches and horizontal management. Exceptions include EDP's, Holocom's, and wall mounted racks/cabinets.

Labels shall be permanent, waterproof, and readable with permanent lettering and shall not be removable by normal cable handling operations. WAP Labeling must include the following: TO Port # (e.g. 2.0-1- 23), MAC address (00-00-00-00-00-00), and site number – Serial # (e.g. 575-0123456); to be located on the face of the WAP; visible and legible. Note: in the event that cables and or faceplates are not labeled or labeled with the incorrect numbering scheme please label per APS Standards.
